

# Join the iUTAH Summer Research Institute

**When: July 7-11, 2014**

**Where: Utah State University, Logan, UT**

Teachers, undergraduates and high school students:

Looking for a unique experience this summer? Spend a week performing real research investigating the interaction of urban and natural areas in the Bear River Watershed. Learn something new and contribute your findings to the bigger picture of water sustainability along the Wasatch Front.

During the week you will:

- Work with scientists to perform hands-on research in: storm water impact, land-use, climate modeling and attitudes and values related to water sustainability.
- Analyze your data and share your research findings at a scientific meeting on the last day of the Institute.
- Earn a stipend for your participation.

**Who is eligible to apply?** (See each application site for more details)

**Teachers of Grades 7-12 in Science,  
Social Studies and Technology**
