

Undergraduate Opportunities

iFellow Summer Research

The iFellows program provides an opportunity for students from every Utah institution of higher education to gain first hand research experience working with professionals in the field.

- 9-week research insitution at either the University of Utah(UU), Utah State University(USU) or Brigham Young University (BYU).
- Spend 40 hours a week on research projects under guidance of a mentor
- Present results in a poster session at the annual iUTAH Symposium at the end of the summer

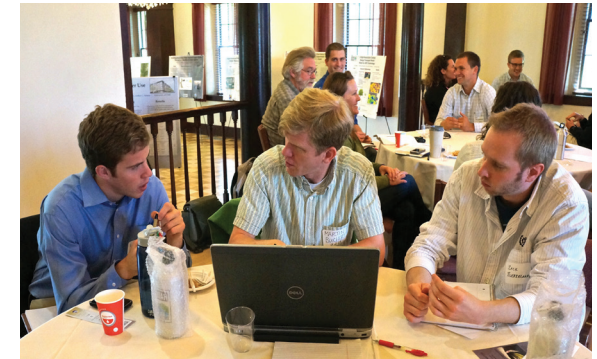

Summer Research Institute

Summer Institute engages teams of high school students and teachers with undergraduate students to conduct research in a local watershed. Paired with an undergraduate or graduate student, students will have the opportunity to connect their scientific discoveries with real water sustainability implications. These discoveries will be used help tie in sustainability concepts into curriculum taught in the class room.

- Week long program
- Valuable mentorship
- Hands-on experience

Internship Program

The iUTAH Internship program matches undergraduate students with iUTAH collaborators in the private sector or government agencies, affording students the opportunity to gain valuable experience in STEM-related fields. Internships will provide prospective employers the opportunity to guide, mentor and evaluate potential employment talent.

- Experience in Government and Private Sector
- Summer Employment
- Valuable Networking
