

CALL FOR ABSTRACTS

The Salt Lake County Health Department announces a Call for Abstracts for the **2018 Annual Climate & Health Symposium** scheduled to be held April 25-26, 2018 at the Jordan Valley Conservation Garden Park, 8215 South 1300 West, West Jordan. We are seeking proposals on topics relating to the current state of climate science and on health impacts related to climate.

The main purpose of the symposium is to bring together academia, public health agencies and other related organizations and stakeholders to have a conversation about the current state of knowledge of climate science and for the presentation of mitigation strategies aimed to cope with the range of potential adverse climate scenarios are encountering now and may encounter in the near future.

Submissions:

Program/Research Presentation (30 or 60 minutes): Delivered during breakout sessions at the conference, oral presentations are intended to provide attendees a synopsis of relevant research, or a public health program, initiative, or other related topic. Presenters should ensure that time is available for Q&A as part of their session.

All abstracts submitted by authors must provide complete and accurate contact information in order to be notified of abstract status.

If your abstract is selected for presentation, you and any co-presenters who will be attending must each register for the conference; there is no fee associated with registration.

Abstracts should be submitted to Royal DeLegge at rdelegge@slco.org by the due date. Please reference the 2018 Climate & Health Symposium in the subject line of your email.

Abstract Deadline: February 23, 2018, 11:59pm (MST)

We welcome your submissions and look forward to your contribution at the 2018 Climate & Health Symposium.

Refer to the conference EventBrite page for additional information:

SAVE THE DATE: APRIL 25-26, 2018

Climate & Health Symposium

Salt Lake County Health Department is holding a Climate Change and Health Symposium to bring together a diverse audience of health professionals, climate experts, and the general public to study and discuss the local health impacts of climate change. The symposium's goal is to increase understanding of the public health issues climate change presents, and encourage discussion on how to build a healthier, more resilient community.

*Registration information coming soon.

- Water scarcity and quality
- Air quality
- Insect populations
- Heat waves
- Food supplies
- Vulnerable populations
- Reducing emissions
- Panel Discussion
